

FTPL SureGrip™保险型测试探头和测试线组

主要特性

- 内置保险丝，提供额外保护
- 2 mm 旋入式探针，含可拆卸4 mm 锥形簧片，可拆卸GS38 绝缘帽
- 操作温度：- 20 °C to 50 °C
- CAT III 1000 V, CAT IV 600 V, 10 A
- 含 Fluke TL224 测试线

产品概述: FTPL SureGrip™保险型测试探头和测试线组

In response to new ESA guidelines, Fluke introduces test probes with built-in fuses for additional measurement protection. And, if the probe fuse does blow, these probes will still allow the meter to indicate live voltage helping to prevent a possible misreading of no voltage present. The new modular FTP probes can mount onto any Fluke modular lead format. The FTPL set includes Fluke TL224 modular leads with the fused test probes. Rated to CAT III 1000 V, these probes also have removable sheathed tips for additional safety.

产品规格: FTPL SureGrip™保险型测试探头和测试线组
